This certificate tells you whether this vehicle has been given the 'all clear' by hpi after a comprehensive search on the following registers:

VIN Match

Compares the Vehicle Registration Mark (VRM) against the Vehicle Identification Number (VIN), where your dealer has provided both, to try to detect a 'ringer' or 'clone', i.e. a stolen vehicle with a false identity.

Vehicle Identity

Does the vehicle match the description recorded by the DVLA? Details of all road registered vehicles are recorded at hpi and the hpi check reflects information recorded on the vehicle's official V5 document.

First Registration

hpi confirms the vehicle's first date of registration in the UK to help establish the true value of the vehicle.

Outstanding Finance

Over half of new cars are bought using finance agreements, making them the property of the finance company until the debt is cleared. hpi has over 7.5 million records on this register, against which this vehicle has been searched to highlight any outstanding debt.

Condition Alert

Has a car been 'written-off' by an insurance company following damage or theft? hpi registers 40,000 write-offs every month. Each hpi check searches over 14 million records to make sure the vehicle is not a total loss or now belongs to an insurer.

Condition Inspected

hpi has a unique register of former damaged 'write-offs' which have passed an inspection against a Thatcham approved standard to confirm the integrity of the repairs.

Stolen Vehicles

Any vehicle currently recorded by the police as stolen is highlighted in the search.

Security Watch

Some vehicles such as hire cars, are at special risk from fraud or theft. This register checks for vehicles that are flagged as 'at risk' and being offered for sale without the owner's consent.

Plate Transfer

Plate transfers are perfectly legal, but can be used to cover a dubious past. A hpi check will automatically pinpoint all plate transfers since April 1990 and make sure that none of the prior identities have anything to hide.

Mileage

The National Mileage Register (NMR), with over 200 million readings, can help reveal discrepancies in a vehicle's mileage history.

Important Information

Following a decision made by the relevant approval authority relating to the EC type approval for your vehicle, technical measures were to be implemented by Volkswagen as part of a service action in respect of your vehicle.

Those approved technical measures have been performed on your vehicle and Volkswagen would like to reassure you that your vehicle complies fully with the relevant regulations.

Volkswagen also wishes to reassure you that the successful implementation of the measures does not adversely impact the engine performance, fuel consumption, CO₂ emissions, torque or noise of your vehicle, and that all values related to the type approval for your vehicle remain valid.

We hereby confirm that the 23R7 service action has been correctly performed.

For Volkswagen, maintaining customer trust and satisfaction is our highest priority. Volkswagen confirms that if a customer makes a complaint to an Authorised Repairer or to the Volkswagen Group in respect of a failure of the EGR, fuel injection system or emissions after treatment system within 24 months following the date of the implementation of the technical measures, in respect of a vehicle with mileage not exceeding 160,000 miles, Volkswagen would consider the complaint very carefully and if such complaint was established to have arisen as a result of the implementation of the technical measures then Volkswagen will act reasonably and swiftly, in line with its goodwill policy, as supplemented in the annex, to respond to the consumers' reasonable concerns.

Should you have further questions concerning this measure or this certificate after carrying out the campaign, please contact the Volkswagen Diesel Hotline on 0800 954 0225.
