Tyre labelling

What does it all mean?

All tyres now come with a label that gives ratings for fuel efficiency, wet grip and rolling noise. In the case of fuel efficiency, a rating of A indicates the most efficient and G the least. For wet grip, a tyre with an A rating provides the shortest braking distance and G, the longest. Finally, external rolling noise is measured in decibels. One wave indicates a quieter tyre and three waves are louder (when comparing identical section widths).
