Technican Comments

After service was carried out, vehicle was taken on a road test and a regen took place while on road test, we would urge the customer to be mindful of the intake manifold flap that is problematic on these vehicles.

Labour Amount GE

DPF Diagnostic Assessment 75.0

This is a full global scan of the vehicle using up to date diagnostic software, we have carried out a number of basic tests to allow us to diagnose the potential issue that is causing you a concern with your vehicle.

 We have used a number of data systems to look up technical information, this could include wiring diagrams, fuse locations, Technical service bulletins and test plans or procedures.

 All of the above allows us to build a good Picture of what the issue is and help us towards our first time fix with no unnessary parts being fitted.

 As with all modern vehicles with very complicated electrics and modules, on some occasions we have to fix certain items/parts before we can carry on to further testing.

 We try our best to keep you updated with outcomes.

 If you have any questions about the diagnoses please feel free to as to speak to the Technician.
