This is a generic service book for all makes and models of vehicles.

A complete and up-to-date service and maintenance record will enhance the resale value of your vehicle.

A vehicle maintained in accordance with the manufacturer's recommendations will generally be more reliable than a vehicle that is not maintained correctly.

If you are unsure of the correct service intervals for your vehicle contact the vehicle manufacturer for confirmation.

IMPORTANT SAFETY INFORMATION PLEASE READ

- Please check your wheel nuts after 50 miles
- It is strongly recommended tyres on 4x4 vehicles are used in identical sets of 4 (same size, make, pattern, load index & speed symbol)
- Vehicle manufacturers' recommendations should also be followed

WHAT IS A TYRE LABEL?

A Tyre Label is a snapshot of basic information for consumers purchasing motor vehicle tyres. (Much like the energy labels on white goods) Manufacturers of tyres for cars, light and heavy trucks must specify fuel consumption, wet grip and noise classification of every tyre sold in EU market starting in November 2012. BRAKE SPECIFICATION AND INSPECTION REPORT

All modern cars have disc brakes on the front wheel and many models have discs on the rear as well. Brakes pads and discs are part of the brake system of your car and as such are safety critical components.

Disk pads gradually wear out. They should be inspected at every service and renewed when they have worn to a specified minimum. Minimum is classed as when the brake pads or brake shoes are worn to the vehicle manufacturers replacement recommendation (noted below).

Checking your brakes every 10,000 miles (or immediately if the brakes start to sound or perform differently to normal) will keep your braking system safe and you safe on the road.

Min vehicle manufacturer spec:
